recursion

Example.

Function to test if a number is even.

pair true fls

↓ swap

pair fls true

↓ swap

pair true fls

swap = $\lambda p. \text{pair } (\text{snd } p) (\text{fst } p)$

init = pair true fls

Even = $\lambda n. \text{fst } (n \text{ swap init})$

3 swap init = swap (swap (swap init))

per fls true

... true 1.

$\underbrace{\quad\quad\quad}_{\text{pair true ...}}$
 $\underbrace{\quad\quad\quad}_{\text{pair true fls}}$
 $\underbrace{\quad\quad\quad}_{\text{pair fls true}}$

prd - 1 ?

```

x = 0
y = 0
for i = 1 to n
{
  x = y
  y = y + 1
}

```

zz = pair 0 0

next = $\lambda p. \text{pair } (\text{snd } p) (\text{succ } (\text{snd } p))$

prd = $\lambda n. \text{fst } (n \text{ next } zz)$

n = 3

prd 3 = $(\lambda n. \text{fst } (n \text{ next } zz)) 3 =$

fst (3 next zz) =

fst (next (next (next zz))) =

$\underbrace{\quad\quad\quad}_{\text{pair 0 1}}$
 $\underbrace{\quad\quad\quad}_{\text{pair 1 2}}$

$$\begin{array}{c}
 \underbrace{\quad \quad \quad \text{pair } 1\ 2 \quad \quad} \\
 \underbrace{\quad \quad \quad \text{pair } 2\ 3 \quad \quad} \\
 2 = \text{prd } 3
 \end{array}$$

is zero

$$\text{is zero } n = \lambda n. n \text{ ? } \text{true}$$

$$\begin{aligned}
 \text{if } n = 0 \quad \text{is zero } 0 &= (\lambda n. n \text{ ? } \text{true}) 0 \\
 &= 0 \text{ ? } \text{true} \\
 &= \text{true}
 \end{aligned}$$

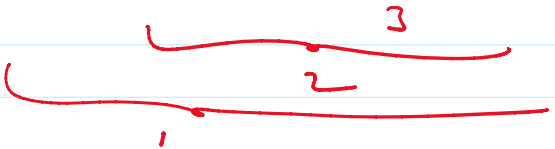

$$\begin{aligned}
 \text{if } n > 0 \quad \text{is zero } n &= (\lambda n. n \text{ ? } \text{true}) n \\
 &= (\underbrace{\text{? } (\text{? } (\text{? } \dots (\text{? } \text{true}))}_{n \text{ times}}))
 \end{aligned}$$

$$\text{?} = \lambda x. \text{false}$$

$$\boxed{\text{is zero} = \lambda n. n (\lambda x. \text{false}) \text{true}}$$

$$\boxed{\text{minus} = \lambda m. \lambda n. n \text{ prd } m}$$

$$\text{minus } 4\ 3 = ((\lambda m \lambda n. n \text{ prd } m) 4) 3$$

$$\begin{aligned}
 &= 3 \text{ prd } 4 = \\
 &= \text{prd} (\text{prd} (\text{prd } 4))
 \end{aligned}$$

$$\text{gteq} = \lambda m. \lambda n. \text{iszero} (\text{minus } n \text{ } m)$$

$$\begin{aligned}
 &= 0 \text{ if } m \geq n \\
 &\neq 0 \text{ if } m < n
 \end{aligned}$$

$$\text{equal} = \lambda m. \lambda n. \text{AND} (\text{gteq } n \text{ } m) (\text{gteq } m \text{ } n)$$
